

# Greener, + Stronger & Cleaner

**COMITE**  
MATERIAL

# Comite Material

Made from a patented cutting edge material called Comite which is derived from sustainable Paper Pulp

Its molecular structure consistently provides a smooth ceramic-like feel.

**(No Orange peel effect, which is present with all other composite seats).**

The Comite material is far superior to the duroplast material currently on the market in terms of durability and longevity.

# Sustainable Material

Made from a patented cutting edge material called Comite which is derived from sustainable Paper Pulp.

Its molecular structure consistently provides a smooth ceramic-like feel. The Comite material is far superior to the duroplast material currently on the market in terms of durability and longevity.

(No Orange peel effect, which is present with all other composite seats).

Recyclable materials save energy, reduce air and water pollution, lower greenhouse gas emissions, and protect natural resources.

# How our toilet seat is more hygienic

Kills microorganisms such as bacteria or mold, or stops them from growing and causing disease.

A smoother surface prevents dirt from accumulating in certain areas.

Won't Absorb Fake-Tan!

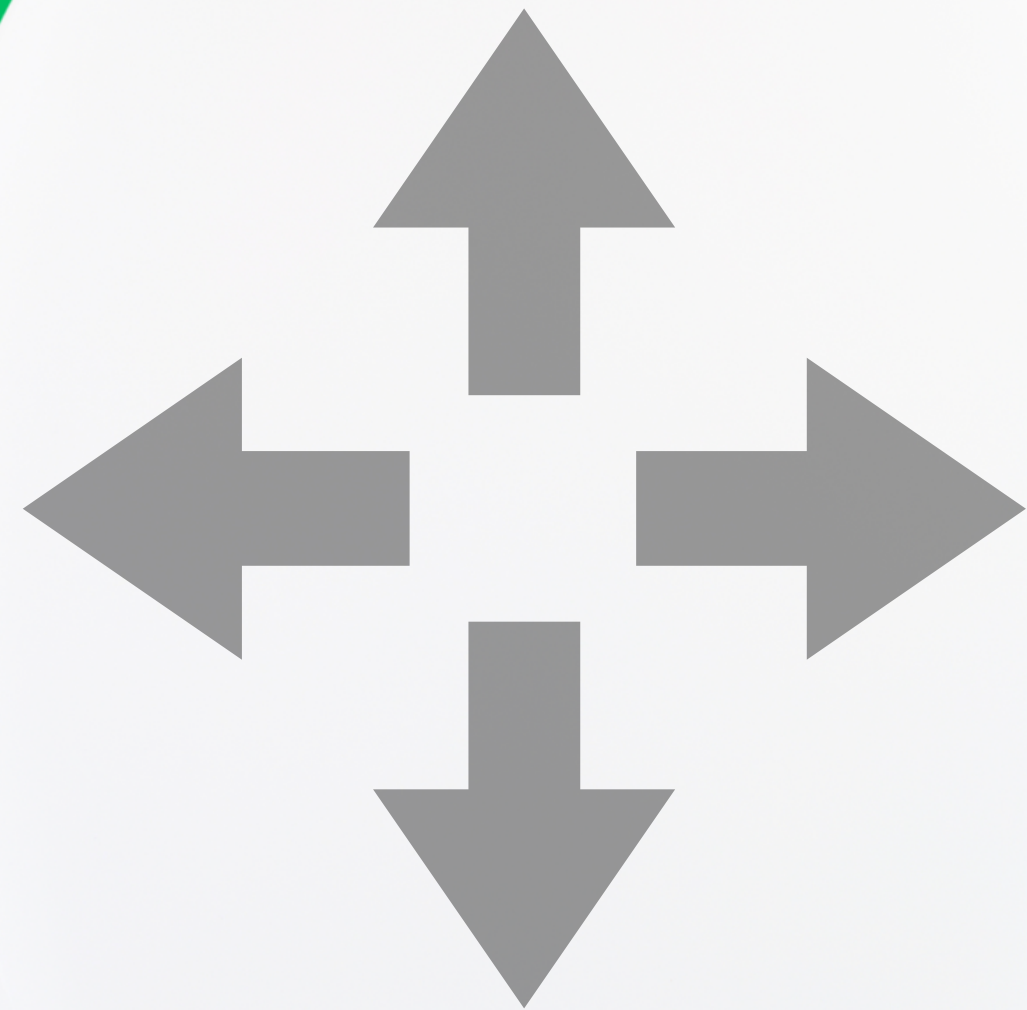

# Adjustable and soft-close

**Our soft close seats are not only quiet, they're nearly impossible to slam.  
Say goodbye to weak and wobbly seats!**

**Concerned about perfect placement? All of our toilet seats are made with fully adjustable fittings to ensure that they perfectly fit your toilet.**

**Fully adjustable in both directions, forward and backward, as well as left to right.**

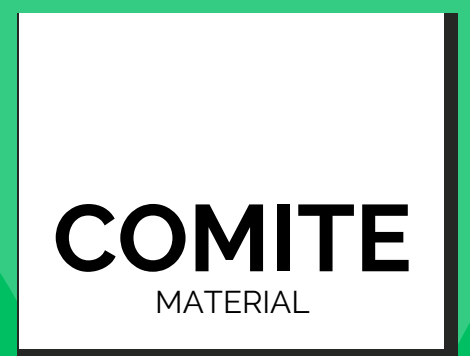

# Quick-Release

All seats include convenient modern features like quick release hinges for easy cleaning. No more cleaning around hinges and other difficult-to-reach areas. Simply press the central button to release the seat.

# Upgrade Now

Upgrade your bathroom with our next-gen toilet seat. Join us in revolutionizing the industry.
